

CLEAR X

FEATURES & ADVANTAGES

The new dimension for teeth straightening

“A legacy of smart paths
from science to smiles”

WHAT ARE CLEARX ALIGNERS?

ClearX aligners are a series of clear aligners manufactured using 4D technology. Based upon simple first principles of physics and mechanics, ClearX provides advantages on several multitudes whether for the practitioner, patient as well as our planet.

Our goal is to decrease plastic usage in the orthodontic field while leveraging the smart-ness of teeth straightening to extents that were not possible before. We are proud of all the work poured into this technology over recent years to bring a paradigm shift that is inevitable for the whole market to adopt in the coming years.

3 SIMPLE STEPS FOR YOUR PATIENTS

STEP 1 APP DOWNLOAD

QR Code can be scanned or
"ClearX" can be searched in
Google play store or Apple store
to download the app.

ClearX app

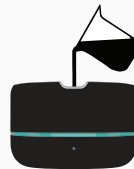

INSTRUCTIONS
video

STEP 2 IS IT BOOSTING DAY?

Booster needs to be connected
with ClearX app.
*bluetooth, location and notifications
must be turned on.*

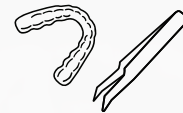

Water needs to be
poured into the booster.
Then preheating starts.

STEP 3 BOOSTING OF ALIGNERS

Aligners must be placed in
the booster.

Boosting is activated

BOOST

CLEARX MOBILE APP

For a seamless and well controlled treatment flow, the aligner booster is accessed easily and individually per patient. The software guides the patient easily through the steps of aligner activation.

ADVANTAGES

of ClearX aligners over traditional aligner system

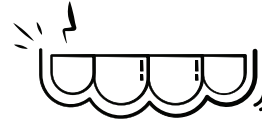

ACCURACY

Each aligner acts as a retainer in the first week of wearing

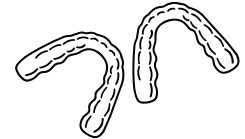

TIME EFFICIENT

Teeth movement acceleration is higher

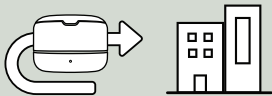

LESS PAINFUL

on aligner insertion

LESS PLASTIC

Less aligner and 3D model count

BE ECO-FRIENDLY

You can return the booster and the aligners at the end of your treatment in order to help us to reduce electronic and plastic waste for a pollution free environment.

HELP THE OCEAN

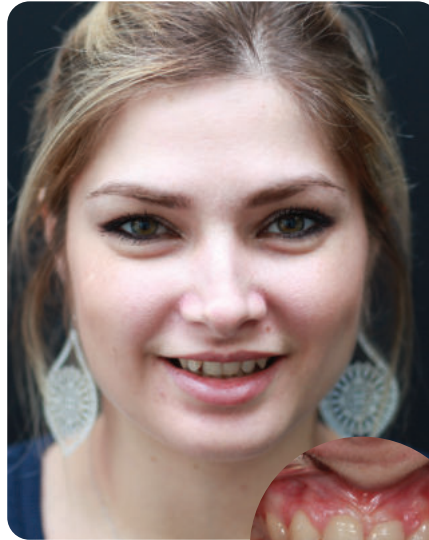

Every ClearX smile will remove 1 pound of plastic from the ocean!

CLEARX RESULTS

4.5 months treatment

The 4D technology used in the making of ClearX has superior results in comparison to the classical aligner treatments. Thanks to the recurrent aligner patented method, the teeth movement lag, often seen in classical methods, is overcome and continuously being adjusted on monthly basis.

While the treatment accuracy is mandatory, we didn't forget how crucial speed is. ClearX provides 35% shorter treatment durations in comparison to other classical systems in the market, with ClearX up to 1.5mm/month tooth movements could be expected.

Cooperation

We have set cooperations to study thermomechanical behaviour, shape memory characteristics, and orthodontic forces exhibited by the material.

WHAT DOCTORS SAY

Dr. S. Kandil

Germany - K Line Europe

"The future of orthodontics is great and we are determined to play a major role in it. 4D ortho is a fundamental move for the whole industry. It opens the door to so many new possibilities. Accurate, fast, eco-friendly and smart are all conceivable meanings 4D brings to orthodontics."

Dr. Charlston Uy

Phillipines

"4D aligner technology is a game changer. It will revolutionize the field of Aligner Orthodontics and I'm glad that K Line will lead that revolution."

Dr. Arozo Ah.

Germany

"I worked with different aligner systems and nothing convinced me more than the 4D aligners from K Line. Even complex orthodontic cases are possible to treat in a simple and efficient way. My patients were surprised by the very fast and pleasing results. It's definitely my number one choice in teeth straightening."

Dr. G. Singh

India

"The only thing permanent in life is change. And aligner technology per say was disruptive for orthodontics. Now ClearX is likely to be disruptive for the aligner industry. Looking forward to change with 4D."

Dr. R. Hughes

United Kingdom

"The new K Line ClearX 4D technology brings fantastic innovation and disruption to the clear aligner industry. ClearX is a millennialisation of orthodontics, a very exciting concept for both clinicians and patients."

Dr. C. Dewdney

United Kingdom

"K Line is an already established, dynamically growing and ever innovative orthodontic company that has focused, very uniquely, cutting edge scientific research and development with ecological awareness and responsibility to reduce our "plastic footprint". The utilisation of smart materials, coupled with patient booster units to track aligner modifications and instigate them is revolutionary!"

CLEAR X

The clear aligners are a customized orthodontic device intended for teeth straightening for a particular patient.
