SCIENCE

Thanks to Dr. Fiker's researches, a unique active combination was born, in which the active substances specifically affect skin renewal in a synergistic manner. The secret of innovation is in the unique combination of peptides and TrioStem3 complex.

**TrioStem³
Complex**

Dr. Fiker's work has been influenced by several Nobel Prize awarded scientific discoveries. These include John B. Gurdon and Jamanaka Sinja's stem cell research, that has been awarded with a Nobel Prize in year 2012 and Stanley Cohen's Nobel Prize-awarded achievement for the discovery of epidermal growth factor in 1986.

**Based on
Nobel Prize**

ACTIVE INGREDIENTS

THE SECRET OF THE INNOVATION IS THE TRIOSTEM3 COMPLEX

Swiss apple
stem cell extract

Human stem
cell activator

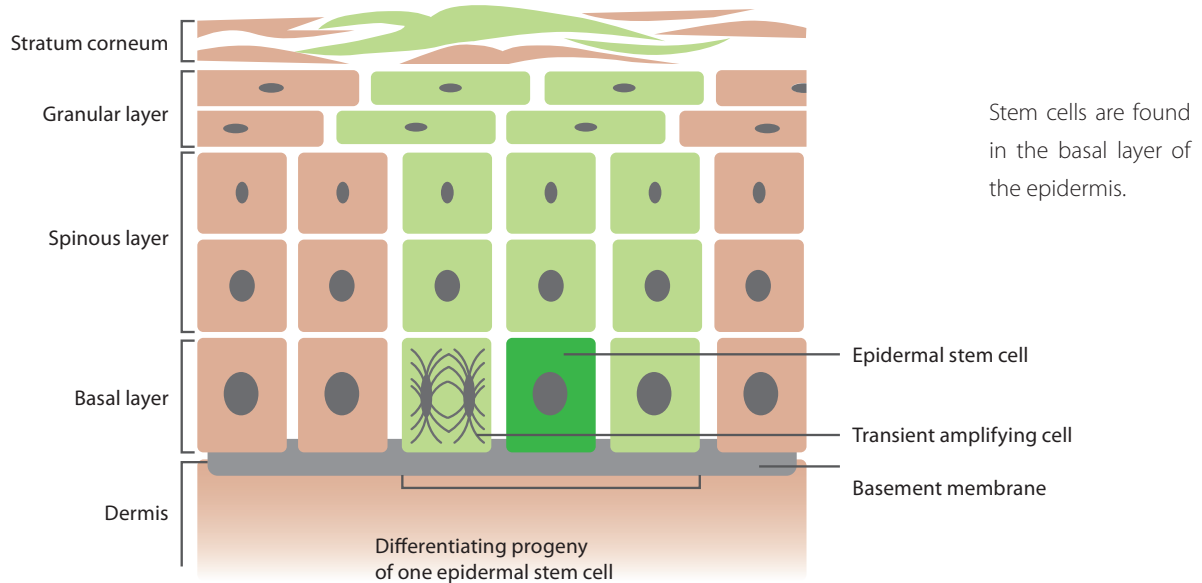

Bitter orange
stem cell extract

In order to correct all the skin imperfections, Dr. Fiker in his recipe used intensive anti-wrinkle and regenerating peptides and other ingredients, which specialize in various problems.

STEM CELLS IN THE SKIN

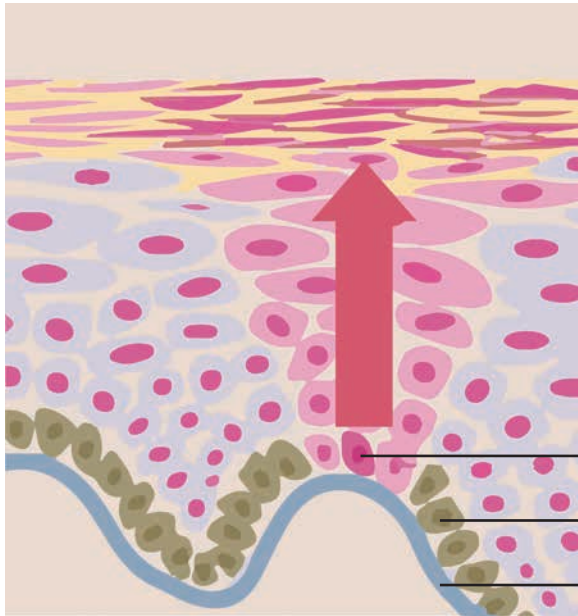

PhytoCellTec Malus Domestica, Mibelle AG Biochemistry Switzerland

These stem cells work as „mother cells” for the cells of epidermis because they are responsible for the reconstruction of damaged cells and for the formation of the new skin stem cells.

ROLE OF THE HUMAN STEM CELLS

Differentiating progeny of
one epidermal stem cell

Skin barrier (stratum
corneum with
keratinocytes and
barrier lipids)

Epidermal stem cell

Basal layer

Basement membrane

However, with aging the stem cell activity is significantly reduced and as a result the aging processes gain ground.

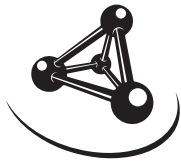

The consequence of this is that less new skin cells are forming, the skin is getting thinner and losing its flexibility; wrinkles are appearing on it.

Young skin is renewed regularly **every 25-28 day**.
However as we are getting old, the regeneration of skin may take **more than 50 days!!!**

THREE STEPS OF THE SKIN REJUVENATION

STEP 1 ACTIVATION OF HUMAN STEM CELLS IN THE EPIDERMIS

**TrioStem³
Complex**

**Stimulates the function
of stem cells
in the skin**

Increases the amount of the stem cells lost with the age.

New skin cells are formed and the extracellular matrix is restored.

Actives are delivering genetic information to the bottom row of the epidermal cells, which delay the chronological aging process of the skin and support the regeneration and the defense processes.

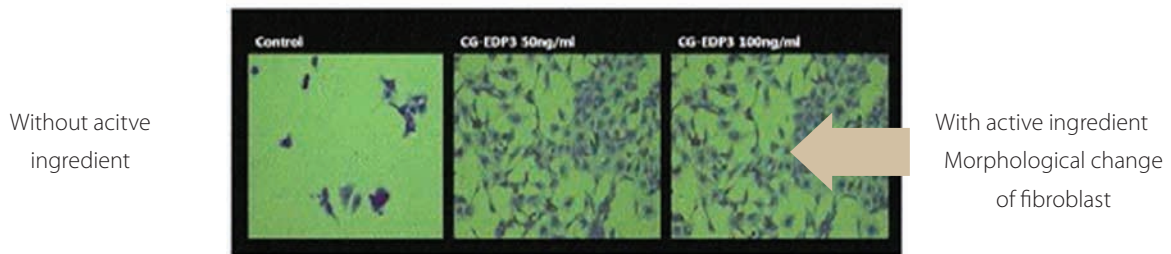

TrioStem3 Complex accelerates the rejuvenation of the skin.

THREE STEPS OF THE SKIN REJUVENATION

STEP 2 STRENGTHENING THE COMMUNICATION BETWEEN THE CELLS

Throughout the natural aging process, our body constantly loses from its collagen, elastin, hyaluronic acid supply, which leads to wrinkles and loose skin elasticity and flexibility.

A) Trio Stem3 Complex activates the collagen-, elastin-, hyaluronic acid-producing fibroblast cells.

The skin tightness and structure is significantly improved.

B) EGF (epidermal growth factor) stimulation

The tests performed on epithelial cells demonstrate that the drug stimulates the EGF (epidermal growth factor) production. The epidermal growth factor was discovered by the biochemist Dr. Cohen, who received the Nobel Prize for this invention in 1986. The epidermal growth factor found in human body promotes skin cell proliferation, thereby contributes to its renewal.

Reduces and prevents lines and wrinkles by actively generating new skin cells.

THREE STEPS OF THE SKIN REJUVENATION

STEP 3 COMBINATION OF PEPTIDES AND OTHER ACTIVE INGREDIENTS

In order to correct all the skin imperfections, Dr. Fiker in his recipe used intensive anti-wrinkle and regenerating peptides and other ingredients, which specialize in various problems.

Acetyl-hexapeptid, heptapeptid and pentapeptid – reduce expression lines by the inhibition of muscle contraction. Due to weakening of the muscle contraction the skin looks younger, wrinkles are softened

Tripeptid-10 Citrullin, Tripeptid-1, Pseudoalteromonas extrac – active substances with wrinkle filling effect, which are aimed to replace and protect the collagen level.

Hyaluronic acid – since it has a high water-binding property, it plays an important role in the maintenance of skin moisture.

DNA Revital serum

DNA Revital emulsion SPF 25

DNA REVITALISING SKIN RENEWAL SERUM AND EMULSION WITH STEM CELLS

DNA Revital combines the skin renewal effect of the stem cell substances with the anti wrinkle and DNA repair effects of the peptide based active ingredients.

The preparation offers optimum protection against the signs of skin aging, it is recommended for the treatment of tired skin, daily exposed to harmful environmental factors.

DNA Revital protects the DNA from damage on a genetic level, thereby significantly delays the process of skin aging.

Wrinkles and fine lines are smoothed, skin elasticity and firmness are improved, lifeless-looking skin becomes saturated with vitality.

Packaging: 30 ml

FS Botu Serum

FS Botu Emulsion with SPF 25

Anti-wrinkle serum and emulsion with stem cells and anti-wrinkle peptides

The preparation is recommended for the treatment of mimic wrinkles at the forehead, around lips, nose and among eyebrows.

These products:

- smooths contour and mimic lines,
- increases skin resistance,
- brightens and tightens the skin.

It's suggested to combine the products: Apply FS-Botu emulsion with SPF in the morning and FS- Botu serum in the evening.

Packaging: 30 ml

FS Botu Intense

ANTI-WRINKLE SERUM WITH STEM CELLS FOR DEEP WRINKLES

The serum is aimed to treat deeper wrinkles.

With its special dosing pen, maximum accuracy and high active ingredient content is an excellent addition to the FS Botu Anti-wrinkle serum.

The intensive anti-wrinkle serum is enriched with **six different peptides**, which create the most powerful anti-wrinkle combination of the Fytofontana Stem Cells product range.

Special dosing pen.

Application: up to 30 days, 2x a day directly into the deep wrinkles; after that once a day to keep the youthful appearance.

Packaging: 4,5 ml

FS Collagen

REJUVENATING EMULSION WITH STEM CELLS FOR WRINKLE FILLING

Throughout the natural aging process, our body constantly loses from its collagen supply, which leads to wrinkles and loose skin. This process continues to worsen due to the decreased number and activity of stem cells, which slow down skin renewal so skin becomes pale, and lifeless.

Fytofontana Stem Cells Collagen is a unique product, which acts from the inside through the natural processes of the skin without any surgery.

The active ingredients provide the replacement of collagen, elastin and hyaluronic acid, thereby support wrinkle replenishing.

Application: up to 30 days, 2x a day for the whole face, after that once a day

Packaging: 30 ml

FS Hyaluron

STEM CELL EMULSION FOR WRINKLE FILLING WITH HYALURONIC ACID

Fills wrinkles with its exceptional substances and hyaluronic acid. The product contains hyaluronic acid from pure sources, produced via biotechnology.

Deeply moisturizes the skin and protects from drying.

Lifeless-looking skin becomes radiant, filled with vitality.

The skin's elasticity is greatly increased.

Application: For optimal results, apply FS Hyaluron emulsion twice a day (mornings and evenings) for up to 30 days. The serum acts gradually, cumulatively and reversibly.

Packaging: 30 ml

FS EyeContour

REJUVENATING SERUM
WITH STEM CELLS
FOR THE EYE AREA

Reduces wrinkles
around the eyes.

Enhances skin elasticity
and replenish substances,
which are necessary for
continued rejuvenation.

Packaging: 15 ml

FS EyeBag

SERUM WITH STEM
CELLS AGAINST
SWOLLEN EYES

Visibly reduces the
appearance of swollen
eyelids accumulated
with fat and water.

The preparation is combined
with intensive Anti-wrinkle
peptides as well.

Packaging: 15 ml

FS EyeDark

REJUVENATING SERUM
WITH STEM CELLS
AGAINST DARK CIRCLES

With the use of this product
discoloration diminishes,
wrinkles are smoothed
and the skin around the
eye area becomes radiant
and rejuvenated.

Packaging: 15 ml

FS Hydro

STEM CELL SERUM FOR INTENSE DEEP HYDRATION

It is an effective complex containing stem cell substances, peptides and Dead sea minerals, which provides intensive deep cell hydration, skin renewal, acts against wrinkles and supports the natural collagen formation in skin.

The osmolytes restore the skin's water binding capacity, attract water into the cells and maintain the optimal cellular water content. The preparation is combined with stem cells and intensive anti-wrinkle peptides.

The skin's moisture content is increased, it becomes perfectly hydrated, rejuvenated and smooth.

Packaging: 30 ml

FS Pigment Serum

PIGMENT BRIGHTENING SERUM

FS Pigment Emulsion with SPF 25

PIGMENT BRIGHTENING EMULSION

FS Pure Pigment

DUAL-PHASE CLEANSING
SOLUTION WITH STEM CELLS
FOR PIGMENTATION

FS Pigment Hand

HAND EMULSION WITH STEM
CELLS FOR SKIN RENEWAL
AND BRIGHTENING

1. Apply the Pure Pigment two-phase cleansing solution in the morning and before sleeping.
2. Apply FS- Pigment Emulsion with SPF in the daytime.
3. Apply FS- Pigment Serum in the night for the intense effect.

Fytofontana Stem Cells depigmentation products have strong pigment lightening effect, which is supported by in vitro and in vivo studies.

The products specifically effect skin pigmentation disorders and skin renewal in a very gentle way. Effectively lighten highly pigmented areas of the skin and even out skin tone.

For a visible effect use the following preparations in combination with at least 60 days:

FS Pure Wrinkle

ANTI-WRINKLE CLEANSING GEL WITH STEM CELLS

-  Cleansing gel gently and effectively cleanses away daily impurities and makeup.
-  The product cleans the skin without drying it.
-  In addition reduces mimic wrinkles and maintains skin tightness.
-  Apply Pure Wrinkle twice a day (mornings and evenings).

Packaging: 125 ml

FS Pure Eye

DUAL-PHASE EYE MAKEUP REMOVER WITH STEM CELLS

-  Given that the skin around the eyes is very thin and fragile, the first signs of aging will appear here, so special care must be taken.
-  Contains two phases to thoroughly remove the make-up. Its innovative formula gently and effectively cleanses the eye contour, while its valuable active substances nourish and renew the skin.

Packaging: 125 ml

The background features a dark blue field with several light blue dashed lines forming a complex, interconnected pattern. In the upper left, three plus signs are arranged in a slight curve. In the upper right, three parallel arrows point downwards and to the left. In the lower center, a single arrow points downwards. The text 'Replacement of plastic surgery operations' is centered in a light beige, sans-serif font.

Replacement of plastic surgery operations

Swiss Quality

Cosmeceuticals = cosmetics + pharmaceuticals

THE TERM COSMECEUTICAL MARKS THOSE COSMETIC PRODUCTS, WHICH ARE COMPLYING WITH PHARMACEUTICAL STANDARDS.

What could it mean?

- Due to the high quality of active ingredients it belongs to the highest category of skin care products
- High concentration of biological active components
- Products provide maximal efficiency
- By the development of the products the latest scientific researches were applied
- **The effects and effectiveness of the products are supported by in vivo and in vitro experiments**

ADVANTAGES OF OUR PRODUCTS

- Due to the high quality of active ingredients they belong to the highest category of skin care products.
- By the development of Fytofontana cosmeceuticals the latest scientific researches were applied.
- High concentration of biological active components, only a small amount of the products is enough to reach the desired effect.
- **The effects and effectiveness of the products are supported by in vivo and in vitro experiments.**
- An important advantage of the products is that the effect can be reached without the interventions of plastic surgery.
- The grouping of products is unique, they are not classified by the skin types, they focus for special skin problems.

PEPTIDES IN COSMETOLOGY

The research of the basic biochemical mechanisms that act against wrinkles has led to the discovery of revolutionary substances, based on peptides, which have astonished experts all over the world. The application of peptides has many advantages:

1. **They stimulate the collagen production – which is necessary to keep the skin's elasticity and flexibility.**
2. **Anti-wrinkle peptides, which similar to botox, decrease the movement of facial muscles thereby smoothing fine lines and wrinkles.**
3. **Peptides, that rebuild the extracellular matrix, therefore rejuvenates the skin.**

By joining the most perfect peptides, FYTOFONTANA COSMECEUTICALS has combined the application of a wide-spectrum approach to wrinkle elimination and the fight against skin aging on the basis of the latest findings in pharmacological and dermatological research.

Botuceutical Forte

ANTI-WRINKLE BIOTECHNOLOGY SERUM

ALTERNATIVE TO
BOTULOTOXINE
INJECTIONS

The Botuceutical serum is a safe, effective and revolutionary alternative to botulotoxin injections. It dramatically reduces mimic wrinkles and smoothes fine lines on the face.

An important advantage of the product is that the result can be reached in a non-invasive way without the use of injections.

- The serum dramatically reduces wrinkles created by facial expressions and smoothes out the fine line of the face
- Botuceutical FORTE anti-wrinkle serum combines the four most perfect peptides into one; 5% pentapeptide, 8% acetyl hexapeptide, 4% heptapeptid and 4% hexapeptid-30.
- the effects are visible after several days
- the results on volunteers showed a reduction of wrinkles by up to 62.8%

Botuceutical Gold

ANTI-WRINKLE BIOTECHNOLOGY SERUM FOR ADULT SKIN

ALTERNATIVE TO
BOTULOTOXINE
INJECTIONS

The Botuceutical Gold serum is a perfect combination of peptides, designed especially for adult skin over 45 years of age.

In addition to four peptides, the Botuceutical Gold contains hyaluronate acid, lipoic acid, DMAE and even gold particles, which give the skin a unique tone and restore its vitality, firmness and elasticity.

The effectiveness of the product was proved by laboratory in vitro measurements and by responds of the volunteers who took part in them. More than 80% of the volunteers noticed a visible reduction of wrinkles.

Botuceutical Platinum

ANTI-WRINKLE BIOTECHNOLOGY SERUM FOR DEEP WRINKLES

ALTERNATIVE TO
BOTULOTOXINE
INJECTIONS

The Botuceutical Platinum biotechnological serum for deep wrinkles is a unique combination of peptides, developed specially for the treatment of the deepest and most visible wrinkles.

By using the revolutionary serum Botuceutical Platinum, which is used as a supplement to preparations as Botuceutical Forte anti-wrinkle serum or Botuceutical Gold anti-wrinkle serum, you can safely and effectively eliminate all the resistant and hard to remove wrinkles.

The preparation contains six perfect peptides, DMAE, lipoic acid and hyaluronate acid.

Laserceutical

ALTERNATIVE TO
LASER SURGERY

BIOTECHNOLOGY SERUM FOR SKIN
RESTORATION AND REGENERATION
- FOR DAY AND NIGHT

By using the Laserceutical Day biotechnology serum, the skin becomes smoother, even and acquires a fresh, youth look. The active substance of the Laserceutical Day preparation combines the topical activity of bearberry leaf extract with that of magnesium ascorbyl phosphate for a powerful and longer lasting skin lightening.

The Laserceutical Day biotechnology serum provides for the peeling and smoothing of the tissue, reduces the formation of pigment, eliminates the scars and wrinkles, brightens and rejuvenates the skin.

The Laserceutical Night biotechnology serum is designed for skin treatment at night time during your sleep. It effectively and rapidly lightens the skin and minimizes liver spots.

Eyeceutical

BIOTECHNOLOGY SERUM FOR PUFFINESS AND EYE BAGS

TREATMENT OF
THE SKIN AROUND
THE EYES

Eyeceutical serum for bags under the eyes consists of a special Eyeseryl ingredient that helps shrink eye bags, visibly reducing the appearance of swollen pouches filled with water. Independent tests have proven that Eyeseryl significantly smoothes the skin, eliminates puffiness, while moisturizing and increasing the skin's elasticity.

The efficacy has been reliably proven by in vitro laboratory tests and by tests on volunteers. In the case of 95% of the volunteers, there was a visible reduction in the swelling of bags under the eyes after 60 days of using the serum twice a day. The first small visible improvements could be seen within 15 days.

Ophthaceutical

TREATMENT OF
THE SKIN AROUND
THE EYES

BIOTECHNOLOGY EMULSION FOR UNDER EYE
DARK RINGS WITH A SIGNIFICANT EFFECT
ON WRINKLES AND BAGS UNDER THE EYES

Thanks to the unique combination of three active molecules, Ophthaceutical represents a global improvement in swollen eyes treatment by acting on the physiological deficiencies.

The emulsion contains the following active substances:

hesperidin methyl chalcone decreases capillary vessel permeability, Dipeptide VW, increases the frequency of lymphangion contraction and Lipopeptide Pal-GQR restores elasticity and firmness, reduces local inflammation.

The combination of active substances contained in the product acts not only against dark rings and bags under the eyes but also against wrinkles. Peptides reduce the depth of the wrinkles formed as a result of muscle contractions at mimicry, especially those around the eyes.

Clinical testing of the active components shows the following results: "smoothed contours of the eyes", reduction in the bags and a decongestant effect reported by 52% of the volunteers.

Collagenceutical

BIOTECHNOLOGY EMULSION FOR FILLING IN WRINKLES

**ALTERNATIVE
TO FILLING
INJECTIONS**

The Collagenceutical preparation is a safer, painless and revolutionary alternative to collagen injections. It helps fill the wrinkles from the inside by initiating the formation of collagen, hyaluronate acid and elastin.

Collagenceutical is a combination of active ingredients based on peptides, glycoprotein from the Antarctic Ocean and hyaluronate acid in liposome form. An important advantage of the product is that the result can be reached in a non-invasive way without the use of injections.

- The emulsion deeply hydrates and firms the skin,
- decelerates the process of skin aging,
- regenerates and visibly rejuvenates the skin,
- eliminates wrinkles and prevents their formation,
- stimulates the formation of natural collagen,
- accelerates the healing of injured skin.

Lipoceutical

DAY & NIGHT BIOTECHNOLOGY EMULSION

A PAINLESS ALTERNATIVE TO FILLING INJECTIONS FOR INCREASING THE VOLUME OF LIPS

The volume of lips increases thanks to the peptide and the Hyaluronate acid in liposome form, which are the main active substances of the Lipoceutical Day and Lipoceutical Night preparations. They stimulate the synthesis of collagen and glycoaminoglycane. This happens in a similar way as by using the filling injections.

The Lipoceutical preparations offer additional active processes that regenerate, hydrate and define your lips. At the same time, they oxidize, nourish and prevent the lips from drying. They restore the structure of the lips and therefore eliminate the wrinkles. The Lipoceutical preparations support the formation of collagen, they moisten, firm and smoothen the lips and define their lines.

ALTERNATIVE
TO FILLING
INJECTIONS

Contourceutical

BIOTECHNOLOGY EMULSION FOR
MOLDING THE NECK AND FACE

FINE CURVES
AND SKIN ON THE
DÉCOLLETAGE

Contourceutical biotechnology emulsion with its effect aimed at the chin and neck area slows down the results of early aging. It improves the elasticity and firmness, hydrates, protects and softens the skin on face and neck. The product visibly helps form the lower part of the face. The neck looks slimmer; its shape is sharper and formed.

The refining components of the preparation suppress the appearance of the double chin – the phenomenon which emphasizes the slacking of the skin. Contourceutical is a combination of active components, containing lipopeptide and Sambucus nigra L. extract.

Clinical testing of the active substances show that using the preparation Contourceutical for chin and neck containing the lipopeptide, regenerates the skin and gives it a softer and symmetric appearance. The skin was more hydrated and firmer on the face and neck.

Decoletteceutical

**FINE CURVES
AND SKIN ON THE
DÉCOLLETAGE**

**BIOTECHNOLOGY EMULSION FOR
FORMING, TIGHTENING AND FIRMING
THE NECK, DÉCOLLETAGE AND ARMS**

The tightening and forming emulsion Decoletteceutical designed for forming, tightening and firming the neck, décolletage and arms, is based on the lifting complex which fosters womanlike shapes. It has an instant effect, thanks to the tightening substances it contains.

Peptide – the active molecule, which is contained in the Decoletteceutical biotechnology emulsion penetrates through the cutaneous surface and reaches the fibroblast cells. It helps protect and tighten the neck, décolletage and arms and restore and firm the sustaining skin tissue of the affected parts. At the same time, it protects from the harmful action of free radicals which cause the early slacking of the skin.

Following the clinical trials of the active substances:

- 92% of the volunteers recorded a moisturizing effect,
- 80% noticed a smoothing effect,
- 86% of the respondents proved reduction of wrinkles and lines.

Pigmentoceutical

BIOTECHNOLOGY EMULSION FOR PIGMENT BLEMISHES

SKIN
WHITENING

The Pigmentoceutical emulsion specifically effects skin pigmentation disorders and skin renewal in a natural and non-irritating way. It reduces pigmentation on the surface of the skin. Thanks to the Pigmentoceutical biotechnology emulsion which combines the effects of the plants Mitracarpe, Uva Ursi and the hydroglycol solution, the strong pigment epidermal cells are removed and the skin whitens.

Uva ursi acts as a whitening component which reduces the occurrence of skin abnormality. It decreases the formation of melanin and therefore gives the skin the required protection. The plant Mitracarpe (*Mitracarpus scaber*) treats brown spots and whitens the skin.

For skin lightening it is recommended to apply to the entire face and neck. For the resolution of local pigment spots apply only locally.

Liftoceutical

BIOTECHNOLOGY EMULSION - ALTERNATIVE TO SURGICAL FACE SKIN TIGHTENING - FACE LIFTING

**ALTERNATIVE
TO SURGICAL
FACELIFT**

The aim of lifting is to achieve a younger, flexible, relaxed and natural appearance. The active ingredients contained in Liftoceutical biotechnology emulsion help rejuvenate the face skin, smooth wrinkles, clean and tighten slack skin. The product contains an effective UV filter and is suitable for all skin types.

Liftoceutical biotechnology emulsion

- reduces visible changes of contours,
- reduces the loss of skin elasticity,
- improves cellular process restoration,
- stimulates synthesis of collagen, elastin, glycosamine,
- tightens, tones and hydrates the skin,
- reduces visible signs of ageing, double lines and deep wrinkles and
- helps maintain a youthful appearance.

Diamondceutical

TREATMENT OF
MATURE SKIN

MAGIC REJUVENATING ELIXIR WITH
EXTRAORDINARY RICH COMPOSITION, WITH
DIAMOND POWDER FOR RADIANT SKIN

The Diamondceutical – magic rejuvenating elixir is a revolutionary step towards prevention of wrinkle formation and elimination of deep wrinkles. The high efficiency of the elixir's active ingredients is completed by diamond powder. It enhances the luminance of skin, balanced skin tone and creates a complex of eternal beauty which prolongs the lifetime of skin cells. The light reflecting particles immediately radiate the skin.

- Designed for mature skin
- Fortifies and restructures thin and fragile skin
- Provides the skin with essential nutrients
- Increases skin's density, firmness and elasticity
- Improves smoothness
- Enhances hydration and cutaneous barrier
- Helps prevent the appearance of age spots
- Improves the skin surface. The skin is smoother, more uniform and looks younger.

Hyaluroceutical

WRINKLE-FILLING BIOTECHNOLOGICAL EMULSION WITH HYALURONIC ACID

Hyaluroceutical, a wrinkle-filling biotechnological emulsion with hyaluronic acid, which deeply moisturizes the skin, improves the filling of connective tissue and visibly reduces the appearance of wrinkles. The preparation contains two types of high-quality hyaluronic acid. Thanks to its size, the smaller amount of hyaluronic acid molecules easily gets into the deeper layers of the skin. The one containing larger molecules forms a protective layer preventing the skin from water loss.

The emulsion contains a combination of such peptides, which support the natural production of collagen and nourish the skin from within. The combination is as follows: Tripeptide-10 Citrulline, Tripeptide-1, hydrolyzed wheat protein, hydrolyzed soy protein, Pseudoaltermonas Antarctica fermented extract.

The Hyaluroceutical moisturizing biotechnological emulsion can be used regardless of age.

**INTENSE
HYDRATION**

Hydroceutical

BIOTECHNOLOGY SERUM FOR INTENSIVE DEEP SKIN HYDRATION

INTENSE
HYDRATION

Hydroceutical biotechnology serum for intensive deep skin hydration is an effective biotechnology complex with Dead sea minerals which provides intensive deep cell hydration, acts against wrinkles and supports the natural collagen formation in skin. In addition, it is enriched with effective UV filter.

- Highly effective moisturizer based on osmolytes
- Inspired by nature, the osmolytes ensure optimal water balance
- Restores the skin's water binding capacity
- Attracts water into the cells and maintains optimal cellular water content
- 3-step hydration on the skin's surface, in the deeper epidermis and the dermis
- Filling of the skin's water reservoir
- In-depth hydration
- Naturally occurring substances to support the skin's water balance

Rapidoceutical

FYTO-BIOTECHNOLOGY ANTI-WRINKLE EMULSION WITH IMMEDIATE EFFECT

INSTANT
CORRECTION

The Rapidoceutical emulsion with immediate effect reduces visible fine lines and wrinkles of the face, enlarged pores, scars after acne and other signs of aging within few minutes. Rapidoceutical phyto-biotechnology anti-wrinkle emulsion with immediate effect brings visible firming effect into skin treatment and creates flexible layers on the skin, which contract during their drying up and thereby firm the skin.

The preparation reduces the appearance of wrinkles caused by stress, mimicry and aging.

Clinical testing of the active ingredients showed the following results: even complexion, less visible spots, improved luminosity, less red and yellow skin color and improved skin appearance (lines, pores, blemishes).

Rosaceutical

BIOTECHNOLOGY EMULSION AGAINST REDDENED AND FLUSHED SKIN ON THE FACE

AGAINST FACIAL
REDNESS

The Rosaceutical biotechnology emulsion normalizes the skin, balances microcirculation, restores pleasant feeling to the skin and minimizes the flush of the skin. It is suited for people who tend to have red blemishes and a disorder of cutaneous microcirculation. It acts preventively and at the same time cares for changes which have already occurred.

The preparation contains the Retinaldehyd C. T. which fosters the metabolism of cutaneous cells especially in the upper layer of the skin and simultaneously reduces the visibility of surface veins. A unique composition of hydrophilic and lipophilic plant constituents makes up the active substance of the preparation. Each plant of the extract contributes with its specific properties which are necessary for the achievement of the strengthening effect on veins.

Venoceutical

BIOTECHNOLOGY EMULSION FOR LEGS WITH VARICOSE VEINS

AGAINST
VARICOSE VEINS

The Venoceutical biotechnology emulsion is a complex of plant origin for strengthening the veins, enhancing the blood flow and consequently improving the state and appearance of the skin on the legs. It consists of concentrated hydroglycol plant extracts of Arnica, Cypress cones, Solomon's seal, Horse chestnut and it additionally contains a cooling ingredient similar to menthol.

However, while menthol provides with a brief cooling sensation, the applied active substance releases itself gradually and acts in the long term. Thanks to its stimulating effect, the product enhances the cutaneous blood flow in the legs and contributes to improvement of the phenomenon of "heavy legs". At the same time, it improves the state of the skin on the legs, both esthetically and functionally.

Pureceutical

CLEANSING GEL AGAINST FINE WRINKLES

ADVANCED FACIAL
CLEANSING

PURECEUTICAL Intensive cleansing gel against fine wrinkles contains a combination of herbal peptides and extracts, which act against fine wrinkles while thoroughly clean and treat your skin. Thanks to hexapeptide, hyaluronic acid in liposome form, and a molecular film coating, which form the main active ingredients of the Pureceutical cleansing gel, the skin is cleaner, firmer and smoother.

The product contains an active substance, composed of a herbal extract mixture from the following plants:

- Hamamelis Virginiana helps to regulate blood circulation and has calming, refreshing and astringent effects.
- Lemon balm has strong antibacterial and anti-inflammatory effects.
- Rosemary and sage have antioxidant properties
- Thyme - has strong antibacterial and antimycotic properties.

Pureceutical

INTENSIVE DEEP CLEANSING FOAM FOR FACE, NECK AND DÉCOLLETAGE

ADVANCED FACIAL
CLEANSING

PURECEUTICAL Intensive deep cleansing foam for face, neck and décolletage is a highly effective peeling agent and pore cleanser. It is an excellent adjunct to the release and removal of aging cells, dirt and grease. Moreover, it is enriched by an active ingredient that plays an important role in preventing wrinkle formation.

It also contains alpha hydroxy acids (AHAs), whose positive effect on skin has long been known, mainly due to their ability to remove dead skin cells from the skin's outermost layer.

Pureceutical

TWO-PHASE CLEANSING SOLUTION FOR WHITENING OF PIGMENT BLEMISHES

ADVANCED FACIAL
CLEANSING

PURECEUTICAL two-phase cleansing solution for whitening of pigment blemishes contains a combination of active ingredients, which have skin-brightening effects while thoroughly clean and treat your skin.

This dual action cleansing solution cleans your face, in a natural and non-irritant way removes the strongly pigmented epidermal cells, and helps to prevent wrinkle formation. The product contains an active ingredient that lightens your skin safely. It adds lighter and brighter skin tone. Another active ingredient is a compound hydroglycol solution, which especially focuses on removal of the strongly pigmented epidermal cells.

Pureceutical

TWO-PHASE CLEANSING SOLUTION FOR PORE SHRINKING

ADVANCED FACIAL
CLEANSING

PURECEUTICAL two-phase cleansing solution for pore shrinking contains a perfect combination of active substances that clean the skin, play a significant role in pore tightening and help to treat acne at the same time.

The regular use of two-phase cleansing solution for pore shrinking may lead to less visible and shallow pores, thanks to which it will be impossible for another layer of impurities to get caught inside them.

CC Ceutical

ALL IN ONE MOISTURIZER

BIOTECHNOLOGY
COMPLETE
CORRECTION

Throughout the day skin needs to replace the naturally lost moisture. The CC ceutical moisturizer stimulates the skin's own hydration system to maintain an optimal moisture level all day long. The components also protect and regenerate the skin, while the color correcting formula and the special rice extract provide a smooth matte skin. It has a lightweight texture, that creates a flawless second-skin effect.

The skin is intensely hydrated and nourished, so the whole day it stays silky and fresh.

The antioxidants protect the skin against free radicals and pollution, while the sunscreen components provide all day long UV protection.

CC Ceutical

CC CREAM WITH INCREASED ANTI-AGING EFFECT AND LOW COVERAGE

BIOTECHNOLOGY
COMPLETE
CORRECTION

The CC ceutical cream with increased anti-aging effect combines the benefits of a skincare product with a features of a skin perfecting foundation. With a unique skin correcting formula refines pores, while provides a natural, light coverage. It creates a flawless second-skin effect, while gives the complexion a natural glow.

The featherweight texture provides a comfortable all day-long coverage, while smoothes, hydrates and nourishes the skin. The antioxidants protect the skin against free radicals and external aggressions. The ingredients for sun protection, provide all-day shield against the harmful effects of UV rays.

CC Ceutical

CC CREAM WITH INCREASED ANTI-AGING EFFECT AND HIGH COVERAGE

BIOTECHNOLOGY
COMPLETE
CORRECTION

The CC ceutical cream with intense anti-aging effect and high coverage combines the benefits of a skincare product with a features of a skin perfecting foundation. With a unique skin correcting formula refines pores, while provides a natural, light coverage.

It creates a flawless second- skin effect, while gives the complexion a natural glow. The featherweight texture provides a comfortable all day-long coverage, while smoothes, hydrates and nourishes the skin. The antioxidants protect the skin against free radicals and external aggressions, while the sun-screen provides UV protection.

Fytofontana Cosmeceutical

PROFESSIONAL RANGE

- In addition to the public packages FC products are also available in professional packages, mainly for beauty salons.
- The FC preparations can be implemented to the habitual cosmetic treatments.
- They can be combined with other active ingredients.
- They are tolerable for the skin.
- They can increase the effectiveness of cosmetic treatments.
- FC products can be applied with different introduction methods.
- They can be introduced by manual massage and ultrasound massages as well.
- Because of the high level of the active ingredients a small amount achieves the desired impact.

Health is
attractive

Our philosophy

Herb Pharma approaches the global market with a clear conception- human health based on natural and biotechnology products.

Natural products – we strive to provide you as many raw materials as possible derived from truly real natural sources. They help to save our health, and they improve the quality of human life.

Innovation – we strive to offer you truly innovative products, ideas and improved methods of production.

High safety – we strive to provide you only raw materials which meet the highest industry quality standards, have been clinically tested, and known to be not harmful when processed into final products.

Guarantee quality – we strive to provide you only raw materials of highest and purest quality available on the worldwide market.

Dental gel for CHILDREN

- CITROVITAL Dental Gel for Children is a massage gel with antiseptics for teething.
- Aloe Vera, contained in the product, helps treat sensitive gums and calms their irritated skin.
- CITROVITAL Dental Gel for Children contains no sugar and reduces the formation of tooth decays during childhood period.

Packaging: 18 ml

Dental gel

- CITROVITAL Dental Gel is designated for gum care.
- It has antiseptic ingredients and a gentle effect of grapefruit seeds.
- It helps overcome irritation in mouth from canker sores and increased gum sensitivity, reduces unwanted microorganisms and keeps plaque from forming.

The product contains no sugar and has a pleasant bitter taste.

Packaging: 25 ml

A body slimming serum with an anti-cellulite effect

A VERY FRESH, GREASELESS AND NON-STICKY SERUM IDEAL FOR EVERYONE WHO SUFFERS FROM OBESITY, ROLLS OF FAT OR WATER RETENTION.

The slimming body serum

- acts against cellulite
- promotes the removal of accumulated fat
- improves the outline of your silhouette
- leaves the skin firmer and more flexible.

The HOODIA Slimming serum contains two kinds of active ingredients:

1. Biotechnology tripeptide complex
2. Polycomplex of plant extracts

Packaging: 120 ml

Phyto-biotechnology hair anti-aging and hair growing serum and tablets
