

fytofontana cosmeceuticals

Replacement of plastic surgery operations

Swiss Quality

fytofontana cosmeceuticals

Cosmeceuticals = cosmetics + pharmaceuticals

The term cosmeceutical marks those cosmetic products, which are complying with pharmaceutical standards.

What could it mean?

- Due to the high quality of active ingredients it belongs to the highest category of skin care products
- High concentration of biological active components
- Products provide maximal efficiency
- By the development of the products the latest scientific researches were applied
- The effects and effectiveness of the products are supported by in vivo and in vitro experiments

fytofontana cosmeceuticals

Introduction

Advantages of our products

- Due to the high quality of active ingredients they belong to the highest category of skin care products.
- By the development of Fytofontana cosmeceuticals the latest scientific researches were applied.
- High concentration of biological active components, only a small amount of the products is enough to reach the desired effect.
- The effects and effectiveness of the products are supported by in vivo and in vitro experiments.
- An important advantage of the products is that the effect can be reached without the interventions of plastic surgery.
- The grouping of products is unique, they are not classified by the skin types, they focus for special skin problems.

Science

Peptides in cosmetology

The research of the basic biochemical mechanisms that act against wrinkles has led to the discovery of revolutionary substances, based on peptides, which have astonished experts all over the world. The application of peptides has many advantages:

- 1. They stimulate the collagen production - which is necessary to keep the skin's elasticity and flexibility.**
- 2. Anti-wrinkle peptides, which similar to botox, decrease the movement of facial muscles thereby smoothing fine lines and wrinkles.**
- 3. Peptides, that rebuild the extracellular matrix, therefore rejuvenates the skin.**

By joining the most perfect peptides, FYTOFONTANA COSMECEUTICALS has combined the application of a wide-spectrum approach to wrinkle elimination and the fight against skin aging on the basis of the latest findings in pharmacological and dermatological research.

fytofontana cosmeceuticals

Alternative to botulotoxine injections

BOTUCEUTICAL FORTE Anti-wrinkle biotechnology serum

The Botuceutical serum is a safe, effective and revolutionary alternative to botulotoxin injections. It dramatically reduces mimic wrinkles and smoothes fine lines on the face.

An important advantage of the product is that the result can be reached in a non-invasive way without the use of injections.

- The serum dramatically reduces wrinkles created by facial expressions and smoothes out the fine line of the face
- Botuceutical FORTE anti-wrinkle serum combines the four most perfect peptides into one; 5% pentapeptide, 8% acetyl hexapeptide, 4% heptapeptid and 4% hexapeptid-30.
- the effects are visible after several days
- the results on volunteers showed a reduction of wrinkles by up to 62.8%

fytofontana cosmeceuticals

Alternative to botulotoxine injections

BOTUCEUTICAL GOLD

Anti-wrinkle biotechnology serum for adult skin

The Botuceutical Gold serum is a perfect combination of peptides, designed especially for adult skin over 45 years of age.

In addition to four peptides, the Botuceutical Gold contains hyaluronate acid, lipoic acid, DMAE and even gold particles, which give the skin a unique tone and restore its vitality, firmness and elasticity.

The effectiveness of the product was proved by laboratory in vitro measurements and by responds of the volunteers who took part in them. More than 80% of the volunteers noticed a visible reduction of wrinkles.

fytfontana cosmeceuticals

Alternative to botulotoxine injections

BOTUCEUTICAL PLATINUM

Anti-wrinkle biotechnology serum for deep wrinkles

The Botuceutical Platinum biotechnological serum for deep wrinkles is a unique combination of peptides, developed specially for the treatment of the deepest and most visible wrinkles.

By using the revolutionary serum Botuceutical Platinum, which is used as a supplement to preparations as Botuceutical Forte anti-wrinkle serum or Botuceutical Gold anti-wrinkle serum, you can safely and effectively eliminate all the resistant and hard to remove wrinkles.

The preparation contains six perfect peptides, DMAE, lipoic acid and hyaluronate acid.

fytofontana cosmeceuticals

Alternative to laser surgery

LASERCEUTICAL

Biotechnology serum for skin restoration and regeneration - for day and night

By using the Laserceutical Day biotechnology serum, the skin becomes smoother, even and acquires a fresh, youth look. The active substance of the Laserceutical Day preparation combines the topical activity of bearberry leaf extract with that of magnesium ascorbyl phosphate for a powerful and longer lasting skin lightening.

The Laserceutical Day biotechnology serum provides for the peeling and smoothing of the tissue, reduces the formation of pigment, eliminates the scars and wrinkles, brightens and rejuvenates the skin.

The Laserceutical Night biotechnology serum is designed for skin treatment at night time during your sleep. It effectively and rapidly lightens the skin and minimizes liver spots.

Treatment of the skin around the eyes

EYECEUTICAL

Biotechnology serum for puffiness and eye bags

Eyeceutical serum for bags under the eyes consists of a special Eyeseryl ingredient that helps shrink eye bags, visibly reducing the appearance of swollen pouches filled with water.

Independent tests have proven that Eyeseryl significantly smoothes the skin, eliminates puffiness, while moisturizing and increasing the skin's elasticity.

The efficacy has been reliably proven by in vitro laboratory tests and by tests on volunteers. In the case of 95% of the volunteers, there was a visible reduction in the swelling of bags under the eyes after 60 days of using the serum twice a day. The first small visible improvements could be seen within 15 days.

Treatment of the skin around the eyes

OPHTACEUTICAL

Biotechnology emulsion for under eye dark rings with a significant effect on wrinkles and bags under the eyes

Thanks to the unique combination of three active molecules:, Ophataceutical represents a global improvement in swollen eyes treatment by acting on the physiological deficiencies.

The emulsion contains the following active substances:
hesperidin methyl chalcone decreases capillary vessel permeability,
Dipeptide VW, increases the frequency of lymphangion contraction and
Lipopeptide Pal-GQR restores elasticity and firmness, reduces local inflammation.

The combination of active substances contained in the product acts not only against dark rings and bags under the eyes but also against wrinkles. Peptides reduce the depth of the wrinkles formed as a result of muscle contractions at mimicry, especially those around the eyes.

Clinical testing of the active components shows the following results:
"smoothed contours of the eyes", reduction in the bags and a decongestant effect reported by 52% of the volunteers.

fytofontana cosmeceuticals

Alternative to filling injections

COLLAGENCEUTICAL

Biotechnology emulsion for filling in wrinkles

The Collagenceutical preparation is a safer, painless and revolutionary alternative to collagen injections. It helps fill the wrinkles from the inside by initiating the formation of collagen, hyaluronate acid and elastin.

Collagenceutical is a combination of active ingredients based on peptides, glycoprotein from the Antarctic Ocean and hyaluronate acid in liposome form.

An important advantage of the product is that the result can be reached in a non-invasive way without the use of injections.

- The emulsion deeply hydrates and firms the skin,
- decelerates the process of skin aging,
- regenerates and visibly rejuvenates the skin,
- eliminates wrinkles and prevents their formation,
- stimulates the formation of natural collagen,
- accelerates the healing of injured skin.

fytofontana cosmeceuticals

Alternative to filling injections

COLLAGENCEUTICAL Collagen food supplement

Collagen is a protein that can be found in most of our connective and supportive tissues, approximately 30% of our body is protein. It's an important element of the skin tissue as well, because protein ensures the tightness of the skin. Our body is capable for collagen production by itself, however, the production is reduced by 1.5% per year- progressed with age. In order to maintain a healthy, smooth, wrinkle-free skin, we need to replace the lost collagen. Vitamin C is important for the production of good quality collagen fibers. Copper, zinc and silicon are essential trace elements for the healthy functioning skin.

The Collagenceutical capsules may positively affect:

- skin rejuvenation
- subcutaneous collagen replacement
- skin elasticity and firmness
- the condition of hair and nails
- it may slow down the skin aging process.

fytofontana cosmeceuticals

Alternative to filling injections

LIPOCEUTICAL

Day& Night Biotechnology emulsion

A painless alternative to filling injections for increasing the volume of lips

The volume of lips increases thanks to the peptide and the Hyaluronate acid in liposome form, which are the main active substances of the Lipoceutical Day and Lipoceutical Night preparations. They stimulate the synthesis of collagen and glycoaminoglycane. This happens in a similar way as by using the filling injections.

The Lipoceutical preparations offer additional active processes that regenerate, hydrate and define your lips. At the same time, they oxidize, nourish and prevent the lips from drying. They restore the structure of the lips and therefore eliminate the wrinkles. The Lipoceutical preparations support the formation of collagen, they moisten, firm and smoothen the lips and define their lines.

fytofontana cosmeceuticals

Fine curves and skin on the décolletage

CONTOURCEUTICAL

Biotechnology emulsion for molding the neck and face

Contourceutical biotechnology emulsion with its effect aimed at the chin and neck area slows down the results of early aging. It improves the elasticity and firmness, hydrates, protects and softens the skin on face and neck. The product visibly helps form the lower part of the face. The neck looks slimmer; its shape is sharper and formed.

The refining components of the preparation suppress the appearance of the double chin - the phenomenon which emphasizes the slacking of the skin. Contourceutical is a combination of active components, containing lipopeptide and Sambucus nigra L. extract.

Clinical testing of the active substances show that using the preparation Contourceutical for chin and neck containing the lipopeptide, regenerates the skin and gives it a softer and symmetric appearance. The skin was more hydrated and firmer on the face and neck.

fytofontana cosmeceuticals

Fine curves and skin on the décolletage

DECOLETTECEUTICAL

Biotechnology emulsion for forming, tightening and firming the neck, décolletage and arms

The tightening and forming emulsion Decoletteceutical designed for forming, tightening and firming the neck, décolletage and arms, is based on the lifting complex which fosters womanlike shapes. It has an instant effect, thanks to the tightening substances it contains.

Peptide - the active molecule, which is contained in the Decoletteceutical biotechnology emulsion penetrates through the cutaneous surface and reaches the fibroblast cells. It helps protect and tighten the neck, décolletage and arms and restore and firm the sustaining skin tissue of the affected parts. At the same time, it protects from the harmful action of free radicals which cause the early slacking of the skin.

Following the clinical trials of the active substances:

- 92 % of the volunteers recorded a moisturizing effect,
- 80 % noticed a smoothing effect,
- 86% of the respondents proved reduction of wrinkles and lines.

fytofontana cosmeceuticals

Skin whitening

PIGMENTOCEUTICAL

Biotechnology emulsion for pigment blemishes

The Pigmentoceutical emulsion specifically effects skin pigmentation disorders and skin renewal in a natural and non-irritating way. It reduces pigmentation on the surface of the skin. Thanks to the Pigmentoceutical biotechnology emulsion which combines the effects of the plants Mitracarpe, Uva Ursi and the hydroglycol solution, the strong pigment epidermal cells are removed and the skin whitens.

Uva ursi acts as a whitening component which reduces the occurrence of skin abnormality. It decreases the formation of melanin and therefore gives the skin the required protection. The plant Mitracarpe (*Mitracarpus scaber*) treats brown spots and whitens the skin.

For skin lightening it is recommended to apply to the entire face and neck. For the resolution of local pigment spots apply only locally.

fytofontana cosmeceuticals

Alternative to surgical facelift

LIFTOCEUTICAL

Biotechnology emulsion - alternative to surgical face skin tightening - face lifting

The aim of lifting is to achieve a younger, flexible, relaxed and natural appearance. The active ingredients contained in Liftoceutical biotechnology emulsion help rejuvenate the face skin, smooth wrinkles, clean and tighten slack skin. The product contains an effective UV filter and is suitable for all skin types.

Liftoceutical biotechnology emulsion

- reduces visible changes of contours,
- reduces the loss of skin elasticity,
- improves cellular process restoration,
- stimulates synthesis of collagen, elastin, glycosamine,
- tightens, tones and hydrates the skin,
- reduces visible signs of ageing, double lines and deep wrinkles and
- helps maintain a youthful appearance.

fytofontana cosmeceuticals

Treatment of mature skin

DIAMONDCEUTICAL

Magic rejuvenating elixir with extraordinary rich composition, with diamond powder for radiant skin

The Diamondceutical - magic rejuvenating elixir is a revolutionary step towards prevention of wrinkle formation and elimination of deep wrinkles. The high efficiency of the elixir's active ingredients is completed by diamond powder. It enhances the luminance of skin, balanced skin tone and creates a complex of eternal beauty which prolongs the lifetime of skin cells. The light reflecting particles immediately radiate the skin.

- Designed for mature skin
- Fortifies and restructures thin and fragile skin
- Provides the skin with essential nutrients
- Increases skin's density, firmness and elasticity
- Improves smoothness
- Enhances hydration and cutaneous barrier
- Helps prevent the appearance of age spots
- Improves the skin surface. The skin is smoother, more uniform and looks younger.

fytofontana cosmeceuticals

Intense hydration

HYALUROCEUTICAL

Wrinkle-filling biotechnological emulsion with hyaluronic acid

Hyaluroceutical, a wrinkle-filling biotechnological emulsion with hyaluronic acid, which deeply moisturizes the skin, improves the filling of connective tissue and visibly reduces the appearance of wrinkles. The preparation contains two types of high-quality hyaluronic acid. Thanks to its size, the smaller amount of hyaluronic acid molecules easily gets into the deeper layers of the skin. The one containing larger molecules forms a protective layer preventing the skin from water loss.

The emulsion contains a combination of such peptides, which support the natural production of collagen and nourish the skin from within. The combination is as follows: Tripeptide-10 Citrulline, Tripeptide-1, hydrolyzed wheat protein, hydrolyzed soy protein, Pseudoaltermonas Antarctica fermented extract.

The Hyaluroceutical moisturizing biotechnological emulsion can be used regardless of age.

fytofontana cosmeceuticals

Intense hydration

HYALUROCEUTICAL capsules

Food supplement containing hyaluronic acid, lychee and longan extract

Hyaluronic acid is a natural substance contained in the tissues of organisms. Its most important feature is that it can bind water molecules many times its own weight, and so provide a sufficient amount of liquids required for the regeneration of tissues and cells. Hyaluronic acid connects and fills the intercellular space to maintain the elasticity and firmness of the skin.

The lychee and longan extracts due to their antioxidant effects are reducing the harmful oxidative processes.

- With the help of the capsules the starch of the skin increases, the wrinkle-filling effect from the inside complements the effect of the Hyaluroceutical biotechnology emulsion.
- The further magnitude of hyaluronic acid is that it allows viscosity of the joint liquid, thereby it decreases the friction on the surfaces of the cartilage, contributes to the elasticity and mobility of the joints.

fytofontana cosmeceuticals

Intense hydration

HYDROCEUTICAL

Biotechnology serum for intensive deep skin hydration

Hydroceutical biotechnology serum for intensive deep skin hydration is an effective biotechnology complex with Dead sea minerals which provides intensive deep cell hydration, acts against wrinkles and supports the natural collagen formation in skin. In addition, it is enriched with effective UV filter.

- Highly effective moisturizer based on osmolytes
- Inspired by nature, the osmolytes ensure optimal water balance
- Restores the skin's water binding capacity
- Attracts water into the cells and maintains optimal cellular water content
- 3-step hydration on the skin's surface, in the deeper epidermis and the dermis
- Filling of the skin's water reservoir
- In-depth hydration
- Naturally occurring substances to support the skin's water balance

fytofontana cosmeceuticals

Instant correction

RAPIDOCEUTICAL

Fyto-biotechnology anti-wrinkle emulsion with immediate effect

The Rapidoceutical emulsion with immediate effect reduces visible fine lines and wrinkles of the face, enlarged pores, scars after acne and other signs of aging within few minutes. Rapidoceutical phyto-biotechnology anti-wrinkle emulsion with immediate effect brings visible firming effect into skin treatment and creates flexible layers on the skin, which contract during their drying up and thereby firm the skin.

The preparation reduces the appearance of wrinkles caused by stress, mimicry and aging.

Clinical testing of the active ingredients showed the following results: even complexion, less visible spots, improved luminosity, less red and yellow skin color and improved skin appearance (lines, pores, blemishes).

fytofontana cosmeceuticals

Against facial redness

ROSACEUTICAL

Biotechnology emulsion against reddened and flushed skin on the face

The Rosaceutical biotechnology emulsion normalizes the skin, balances microcirculation, restores pleasant feeling to the skin and minimizes the flush of the skin. It is suited for people who tend to have red blemishes and a disorder of cutaneous microcirculation. It acts preventively and at the same time cares for changes which have already occurred.

The preparation contains the Retinaldehyd C. T. which fosters the metabolism of cutaneous cells especially in the upper layer of the skin and simultaneously reduces the visibility of surface veins. A unique composition of hydrophilic and lipophilic plant constituents makes up the active substance of the preparation. Each plant of the extract contributes with its specific properties which are necessary for the achievement of the strengthening effect on veins.

fytofontana cosmeceuticals

Against varicose veins

VENOCEUTICAL

Biotechnology emulsion for legs with varicose veins

The Venoceutical biotechnology emulsion is a complex of plant origin for strengthening the veins, enhancing the blood flow and consequently improving the state and appearance of the skin on the legs. It consists of concentrated hydroglycol plant extracts of Arnica, Cypress cones, Solomon's seal, Horse chestnut and it additionally contains a cooling ingredient similar to menthol.

However, while menthol provides with a brief cooling sensation, the applied active substance releases itself gradually and acts in the long term. Thanks to its stimulating effect, the product enhances the cutaneous blood flow in the legs and contributes to improvement of the phenomenon of "heavy legs". At the same time, it improves the state of the skin on the legs, both esthetically and functionally.

fytofontana cosmeceuticals

Advanced facial cleansing

PURECEUTICAL CLEANSING GEL AGAINST FINE WRINKLES

PURECEUTICAL Intensive cleansing gel against fine wrinkles contains a combination of herbal peptides and extracts, which act against fine wrinkles while thoroughly clean and treat your skin. Thanks to hexapeptide, hyaluronic acid in liposome form, and a molecular film coating, which form the main active ingredients of the Pureceutical cleansing gel, the skin is cleaner, firmer and smoother.

The product contains an active substance, composed of a herbal extract mixture from the following plants:

- Hamamelis Virginiana helps to regulate blood circulation and has calming, refreshing and astringent effects.
- Lemon balm has strong antibacterial and anti-inflammatory effects.
- Rosemary and sage have antioxidant properties
- Thyme - has strong antibacterial and antimycotic properties.

fytofontana cosmeceuticals

Advanced facial cleansing

PURECEUTICAL

Intensive deep cleansing foam for face, neck and décolletage

PURECEUTICAL Intensive deep cleansing foam for face, neck and décolletage is a highly effective peeling agent and pore cleanser. It is an excellent adjunct to the release and removal of aging cells, dirt and grease. Moreover, it is enriched by an active ingredient that plays an important role in preventing wrinkle formation.

It also contains alpha hydroxy acids (AHAs), whose positive effect on skin has long been known, mainly due to their ability to remove dead skin cells from the skin's outermost layer.

fytofontana cosmeceuticals

Advanced facial cleansing

PURECEUTICAL

Two-phase cleansing solution for whitening of pigment blemishes

PURECEUTICAL two-phase cleansing solution for whitening of pigment blemishes contains a combination of active ingredients, which have skin-brightening effects while thoroughly clean and treat your skin.

This dual action cleansing solution cleans your face, in a natural and non-irritant way removes the strongly pigmented epidermal cells, and helps to prevent wrinkle formation. The product contains an active ingredient that lightens your skin safely. It adds lighter and brighter skin tone. Another active ingredient is a compound hydroglycol solution, which especially focuses on removal of the strongly pigmented epidermal cells.

fytofontana cosmeceuticals

Advanced facial cleansing

PURECEUTICAL

Two-phase cleansing solution for pore shrinking

PURECEUTICAL two-phase cleansing solution for pore shrinking contains a perfect combination of active substances that clean the skin, play a significant role in pore tightening and help to treat acne at the same time.

The regular use of two-phase cleansing solution for pore shrinking may lead to less visible and shallow pores, thanks to which it will be impossible for another layer of impurities to get caught inside them.

Biotechnology Complete Correction

CC ceutical all in one moisturizer

Throughout the day skin needs to replace the naturally lost moisture. The CC ceutical moisturizer stimulates the skin's own hydration system to maintain an optimal moisture level all day long. The components also protect and regenerate the skin, while the color correcting formula and the special rice extract provide a smooth matte skin. It has a lightweight texture, that creates a flawless second-skin effect.

The skin is intensely hydrated and nourished, so the whole day it stays silky and fresh.

The antioxidants protect the skin against free radicals and pollution, while the sunscreen components provide all day long UV protection.

Biotechnology Complete Correction

CC cream with increased anti-aging effect and low coverage

The CC ceutical cream with increased anti-aging effect combines the benefits of a skincare product with a features of a skin perfecting foundation. With a unique skin correcting formula refines pores, while provides a natural, light coverage. It creates a flawless second-skin effect, while gives the complexion a natural glow.

The featherweight texture provides a comfortable all day-long coverage, while smoothes, hydrates and nourishes the skin. The antioxidants protect the skin against free radicals and external agressions. The ingredients for sun protection, provide all-day shield against the harmful effects of UV rays.

Biotechnology Complete Correction

CC cream with increased anti-aging effect and high coverage

The CC ceutical cream with intense anti-aging effect and high coverage combines the benefits of a skincare product with a features of a skin perfecting foundation. With a unique skin correcting formula refines pores, while provides a natural, light coverage.

It creates a flawless second- skin effect, while gives the complexion a natural glow. The featherweight texture provides a comfortable all day-long coverage, while smoothes, hydrates and nourishes the skin. The antioxidants protect the skin against free radicals and external aggressions, while the sunscreen provides UV protection.

fytofontana cosmeceuticals

PROFESSIONAL

Fytofontana Cosmeceutical Professional range

- In addition to the public packages FC products are also available in professional packages, mainly for beauty salons.
- The FC preparations can be implemented to the habitual cosmetic treatments.
- They can be combined with other active ingredients.
- They are tolerable for the skin.
- They can increase the effectiveness of cosmetic treatments.
- FC products can be applied with different introduction methods.
- They can be introduced by manual massage and ultrasound massages as well.
- Because of the high level of the active ingredients a small amount achieves the desired impact.
