How do gemstones support your beauty?

A Kaviczky Diamonds kozmetikumokban a drágakő-őrleményt egy speciális zselégőmb tartalmazza, amely a bőrön a testhő és enyhe masszírozás hatására felolvad. A benne lévő mannitol fehérje, valamint a deklusztarizált víz elősegíti, hogy a drágakövek akadálytalanul eljussanak a bőr mélyebb rétegeibe és újjáépitésük azt.
