

The PanFlora'Soul cosmetic product family, dreamed up by Kaviczky, is inspired by the ancient medicinal flowers of the Carpathian Basin, which strengthen the harmony of body and soul.

PanFlora'Soul products are special, unique blends of traditional natural materials and the latest scientific discoveries.

The beauty and youth of the skin is ensured by the oily and aqueous extracts of the meadow medicinal flowers, the active ingredients of the sea plants and the extraordinary abilities of the revolutionary (nano) water, which is a revolutionary novelty.
